RESEARCH INTERESTS

Complexity Science, Network Science, Game Theory, Fractal Property, Group Decision-making

EDUCATION

University of Manchester (UoM) — Manchester, UK
Integrated PhD and MSc in Data Analytics and Society (ESRC funded) — Expect Sep. 2025
Advisor: Professor Yu-wang Chen and Tahir Abbas Syed

Singapore University of Technology and Design (SUTD) — Singapore
MEng. (Research) in Science, Mathematics & Technology — Sep. 2021
Advisor: Professor Kang Hao Cheong

Northwestern Polytechnical University (NWPU) — Xi'an, China
B. S. in *Detection, Guidance and Control Technology (System Engineering)* — June 2019
Advisor: Professor Wen Jiang and Yong Deng

[27] Shuai Xu, Zichang He, **Tao Wen**, Wen Jiang*. "A Physarum-inspired Model for the Path Planning of Uninhabited Combat Air Vehicle," *The Eighth Chinese Information Fusion Conference*, Xi'an, China, July 2018. (In Chinese)

Paper submitted to Journal

[28] **Tao Wen**, Kang Hao Cheong*. "Analyzing and Predicting Time Series by Visibility Graph: A Review,"

TBD.

[29] **Tao Wen**, Eugene V. Koonin, Kang Hao Cheong*. "Paradoxical Winning of Host-parasite Evolutionary Dynamics by Parrondo's Paradox," *TBD*.

[30] Zeyi Liu†, **Tao Wen**†, Yong Deng*, Hamido Fujita. "Cooperation-guided Experts Importance Identification Model with Fuzzy Framework: A Network Design," *Information Fusion*.

[31] Qiuya Gao, **Tao Wen**, Xiangfeng Dai, Mengge Chai, Kang Hao Cheong*, Zhen Wang*. "Measuring Similar Nodes in Complex Networks based on Gravity Model," *Complex & Intelligent Systems*.

[32] Kang Hao Cheong*, Michael C. Jones, **Tao Wen**. "'Governing' the ungovernable: When will we learn?" *TBD*.

[33] **Tao Wen**, Yong Deng*. "Information Volume Multifractal Dimension". Prepare to submit.

RESEARCH EXPERIENCE

Data Analytics for Addressing Fake News and Deepfakes in Social Networks Sep. 2021–Now
University of Manchester, Advisor: Professor Yu-wang Chen and Tahir Abbas Syed

- Identified the influential users in the social network by considering multi-source structural information and validated it on the Enron email network qualitatively and other large social networks quantitatively.

Analyzing Parrondo's paradox phenomenon in complex networks Jan. 2020–Sep. 2021
Singapore University of Technology and Design, Advisor: Professor Kang Hao Cheong

- Explored the increase in economic and health costs caused by different strategies (open community & lockdown) under the epidemic of COVID-19, but the loss can be controlled by taking alternating strategies based on time-based and result-based switching scheme – a phenomenon attributed to Parrondo's paradox.
- Reviewed the development and progress of fractal characteristics in the network systematically, including network covering, various concepts of dimensions, and their real-world applications.

Finding Important Properties of Nodes and Communities in Complex Networks June 2019–Sep. 2019
University of Electronic Science and Technology of China, Advisor: Professor Yong Deng

- Combined the internal and external factors of communities to measure each community's vulnerability and improved the recognition accuracy in real-world network applications via the entropy-based method.
- Collected the personal opinion of each expert by 2-order additive fuzzy measure and identified the most important expert after constructing the expert network based on their relationships, thereby solving group decision-making problems without sufficient information.

Exploring the Properties of Networks by Different Dimensions May 2016–June 2019
Northwestern Polytechnical University, Advisor: Professor Wen Jiang & Yong Deng

- Promoted information dimension and Rényi dimension into weighted complex networks and explored complex networks' fractal and self-similarity properties.
- Developed several recognition models based on the dimension of the network to solve practical problems, such as measuring the complexity and vulnerability of airline networks and identifying the similarity and importance of individuals.

Evaluating Vulnerability of Networks Based on Fuzzy Fractal Dimension May 2017–May 2018
Team Leader, National Undergraduate Training Programs for Innovation and Entrepreneurship (￥20, 000)

An Autonomous Landing Scheme for Cargo Drone Based on Computer Vision May 2017–May 2018
Researcher, National Undergraduate Training Programs for Innovation and Entrepreneurship (￥20, 000)

Exploring the Composition and Future Scalability of Smart House Jan. 2019–Feb. 2019
Australian National University, Summer Session Course Project

AWARDS & HONORS

- Decision and Cognitive Sciences Research Centre Support Fund 2022
- ESRC funded integrated PhD and MSc in Data Analytics and Society Scholarship 2021
- Singapore University of Technology and Design MEng (Research) Fellowship 2020

- The “Challenge Cup” National Undergraduate Extracurricular Academic Science and Technology Contest: **Special First Prize** (**Top 4%**) 2019
  Highest award in the field of information science in natural science papers.
  The “Challenge Cup” is the **highest academic science and technology competition** in China.
- The “Challenge Cup” National Undergraduate Extracurricular Academic Science and Technology Contest in Shaanxi Area: **Outstanding Winner** (**TOP 5%**) 2019
  Best grade in the field of natural science papers in NWPU **so far**.
- **Outstanding Student Pacemaker in Northwestern Polytechnical University** (**TOP 0.1%**) 2018
  Only **10 undergraduates** are awarded among more than 12,000 undergraduates in NWPU.
- **China National Scholarship** (**Top 1%**) 2018
  Highest honor for students’ year achievement in the School of Electronics and Information.
- Global Mathematical Contest in Modeling (MCM/ICM): **Meritorious Winner** 2018
- Chinese Undergraduate Mathematical Contest in Modeling in Shaanxi Area: **First Prize** 2017
- Second Prize scholarship of AVIC Optronics Institute (**TOP 5%**) 2017
- First Prize scholarship of Northwestern Polytechnical University (**TOP 10%**) 2017
- Global Mathematical Contest in Modeling (MCM/ICM): **Honorable Mention** 2017

ACADEMIC SERVICE

- Presentation at International Postgraduate Interdisciplinary Forum on Smart Shipping and Green Future in Shanghai Jiao Tong University (Online), Shanghai, China, 2022.
- Special Issue Editor on *Mathematics* (Data-driven Decision Making: Models, Methods and Applications), 2022.
- Teaching Assistant of BMAN73701, Programming in Python for Business Analytics, UoM, 2022.
- Conference presentation at 26th International Conference on Multiple Criteria Decision Making, Portsmouth, UK, 2022.
- Talk at the Oberseminar Dynamics Seminar in Technical University of Munich (Online), Munich, Germany, 2021.
- Teaching Assistant of 10.018, Modelling Space and Systems, SUTD, 2020.
- Conference presentations at 9th China Information Fusion Conference, Taiyuan, China, 2019.
- Talk at Ao Xiang Students' Lecture in NWPU, 2019.
- Independent reviewer for:
  - *Applied Sciences*
  - *Bioengineering*
  - *Communications Physics*
  - *Chaos: An Interdisciplinary Journal of Nonlinear Science*
  - *Electronics*
  - *IEEE Transactions on Signal and Information Processing over Networks*
  - *International Journal of Intelligent Systems*
  - *Journal of Computational Science*
  - *Mathematics*
  - *Physica A: Statistical Mechanics and Its Applications*
  - *Scientific Reports*

SOCIAL ACTIVITIES

- **Volunteer** | International Conference on Intelligent Unmanned System 2018
- **Volunteer** | Northwestern Polytechnical University 80th Anniversary 2018

SKILLS

Technical: MATLAB, Python, R language, C language, LaTeX, Gephi, Origin.
Languages: Mandarin, English.
